

## Where do we work? Tour our office!

We know how to work with a big time difference and at a distance, but we love when our customers visit our office or invite us to visit them.

Face-to-face communication helps our team understand your business better and come to more efficient decisions that adjust to your needs.

## Onix' teams house four office floors.

VR/AR and DevOps

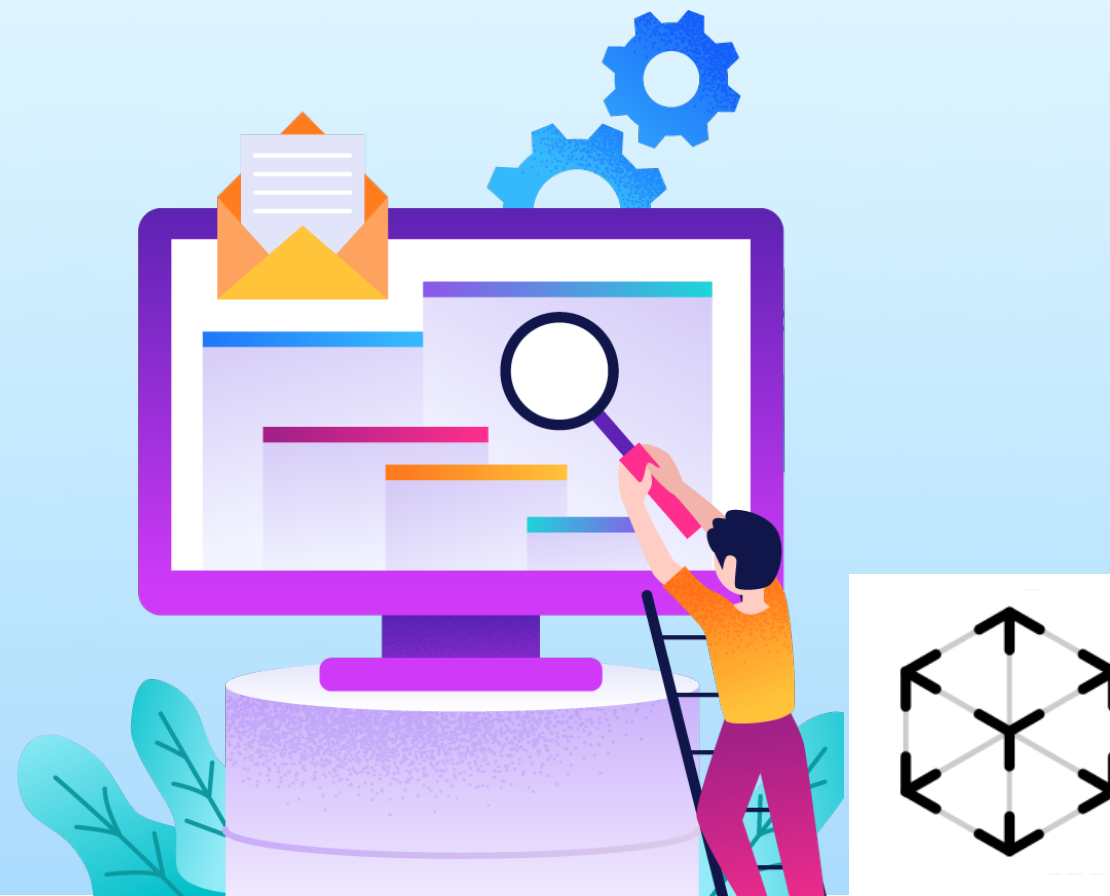

UI/UX design

Android, iOS and IoT

# ONIX

Any technology or business question you have, our teams are ready to answer it!

Available on:

App name: Onix AR

## Meet Onix!

We're eager about technology and we know how to design websites, develop mobile and VR/AR apps and create chatbots and skills for Amazon Echo.

Our approach to building the development process is classic agile and our skill range is enough to work with time-proven technologies while adopting newly emerging programming languages and frameworks.

You express your needs and concerns, we think and suggest viable solutions for your business.  
We do it, it works, you like it.

## About Onix team

Back in 2000 we only had but a small group of 8 developers. But our team has been growing all the time!

Web and mobile developers, UI/UX designers, project managers, QAs and DevOps - we've got all experts you need to ensure a full-cycle development!

As of now our team consists of 140 people.

## What is our expertise?

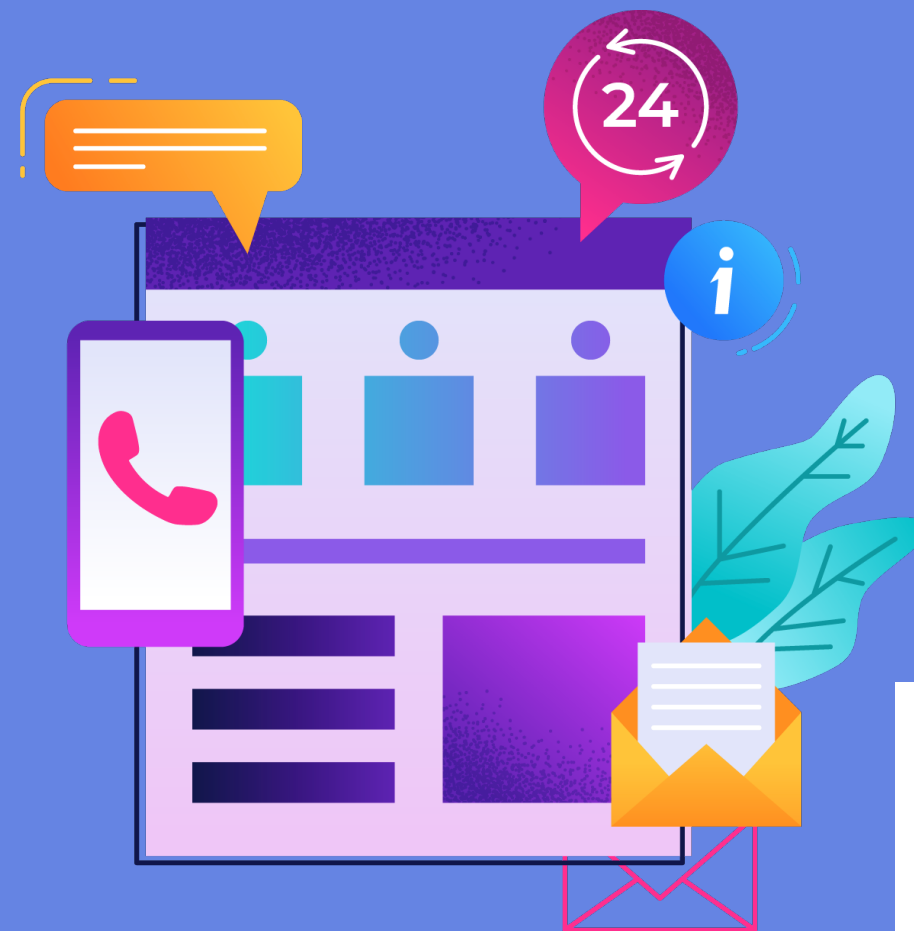

Onix is an expert in software development outsourcing and has established long-term contracts with the customers and business partners in Europe, Asia, the U.S., South America and the Middle East.

## Our world map of projects

## Stay in touch with us

We love communicating with our business partners, customers and friends and keeping them informed and updated about what's new is going on at Onix.

The average contract length for Onix is eight months and longer if it comes to working on large and growing projects that require the team's constant attention and code changes.

With our consulting assistance, we offer you the best plan of action that considers your preferences, your budget and technology's strengths.
